

REFERENCES FOR PAPER MILLS

C.M.O. is a usual supplier of knife gate valves for the paper industry. We are one of best recognized suppliers of the knife gate valves for the paper industry in Spain and we also are present in many new pulp mill constructions all over the world.

As manufacturers of knife gate valves and other types of equipments we are present in the international market, but this presence is not a direct contact with the end users which makes very difficult to know exactly in which places or pulp mills our valves are installed. So, following we are going to give you some information about the places and pulp mills where our valves are installed in Spain and all over the world. This information does not cover a great percentage of the valves installed in different pulp mills but we hope that it will be helpful for you.

C.M.O. in Spain´s Paper Mills

Following you will find the names of pulp mills to which we usually supply knife gate valves or we supplied in the past. To all this paper mills we mainly supply:

Series A wafer knife gate valves (manual and pneumatic) for unidirectional service and for maximum 4% concentration. Series T lugged knife gate valves (manual and pneumatic) for unidirectional service and for maximum 5% concentration. Series L wafer through going knife gate valves (manual and pneumatic) for bidirectional service and for maximum 20% concentration. Series E and Series DT knife gate valve for special service in pulper. Series U knife gate valve. All knife gate valves in different materials according to customer´s request.

C.M.O. WORLDWIDE Paper Mills

Papelera del Nevado (Mexico)

Equipments supplied: Type A wafer knife gate valves (manual and pneumatic) for unidirectional service in stainless steel and for maximum 4% concentration. Type L wafer through going knife gate valves (manual and pneumatic) for bidirectional service in stainless steel and for maximum 20% concentration. Type E and DT knife gate valves in stainless steel for special service in pulper.

Celulosa Arauco / CMPC (Chile)

Valves supplied by our representative in Chile (Interfluid – Mr. Eduardo Medel). We have an annual agreement with them and they are the biggest companies in the paper industry in South America.

Equipments supplied: Type A wafer body knife gate valves (manual and pneumatic) for unidirectional service in stainless steel and for maximum 4% concentration. Type T lugged knife gate valves (manual and pneumatic) for unidirectional service in stainless steel and for maximum 5% concentration. Type L wafer through going knife gate valves (manual and pneumatic) for bidirectional service in stainless steel and for maximum 20% concentration.

Sweeden (Distributor)

Most of them supply usually knife gate valves for the paper industry. Equipments supplied: Type A wafer knife gate valves (manual and pneumatic) for unidirectional service in stainless steel and for maximum 4% concentration. Type E and DT knife gate valves in stainless steel for special service in pulper.

Starline Finland Oy

They supply usually knife gate valves for the paper industry. Equipments supplied: Type A wafer knife gate valves (manual and pneumatic) for unidirectional service in stainless steel and for maximum 4% concentration. Type L wafer through going knife gate valves (manual and pneumatic) for bidirectional service in stainless steel and for maximum 20% concentration.

We supply many valves all over the year for different places and specially last year a DN1100 through going knife gate valve for a project in South America (Brasil) and DN1300 valves for a new paper mill in Uruguay.
